Telecheck Certifies SLIM CD

Slim CD's Software Now Supports Telecheck

Coral Springs, FL Dec 12, 2006 – SLIM CD, INC, a software developer and service provider, announces certification of its transaction gateway and desktop software on the Telecheck platform for check services.

This certification allows Telecheck customers to utilize SLIM CD's software and services to process their check transactions. All transactions are sent over the Internet to SLIM CD's data center where a frame connection is used to process with Telecheck. This allows the SLIM CD gateway to provide high-speed connectivity options to merchants of all sizes. In addition, the SLIM CD standardized programming interface can be used by software developers to support Telecheck services with minimal programming.

The SLIM CD application suite provides desktop software, industry-specific virtual terminals, and a shopping cart. SLIM CD's software can be used by retail, restaurant, hotel, auto rental, direct marketing, and e-commerce merchants. Credit, online debit, and check processing transactions are supported. Transactions sent to SLIM CD's data center are processed through SLIM CD's high-speed connection in 2-5 seconds, without requiring merchants to have high-speed Internet.

The SLIM CD includes a desktop application, data on demand, fraud detection services, and a choice of shopping carts. The SLIM CD runs on any IBM-Compatible Personal Computer with Internet connectivity or that has a modem. Low-cost card -swipe, PIN pad, and signature capture devices are supported. An Enterprise Edition is available for networked environments or to perform data mining of customer information.

The SLIM CD software product is provided to banks and financial institutions for distribution to merchants. More information about the SLIM CD product is available at <http://www.slimcd.com>, where full information on the SLIM CD product line and a short video presentation are available.
