SLIM CD Enables Discover and Diners

Slim CD Has Improved Acceptance by Enabling Discover and Diners for Merchants

Coral Springs, FL Nov 25, 2008 – SLIM CD, INC, a leading POS software developer and service provider, announces it has become the first member of Discover's VAR Connection to be IIN Certified and Validated for the full set of BIN ranges on the Discover Network. In addition, SLIM CD has enabled Discover, Diners and JCB as the default when setting up new merchants. These card types have also been enabled in cooperation with two leading merchant acquirers, with more to come.

"Discover's new VAR Connection certification and validation process made it fast and straightforward to insure our systems were up to date", said Sami Slim, President and CEO of SLIM CD, Inc. "We are happy to assist merchants by enabling these additional forms of payment."

"SLIM CD worked with Discover to insure that all the Discover, Diners and JCB ranges were functioning properly on our system", said Frank Haggar, Director of Product Development. He added: "As a host-based gateway to the processors, we were able to quickly enable Discover's product line for all merchants in a processor base. This approach provides all of our merchants, developers and integrators with the safest and fastest way to integrate changes without affecting installed merchant systems."

The Slim CD Pro package includes a stand-alone desktop application, a web-based virtual terminal, and a shopping cart. The SLIM CD services include gateway services, data on demand, fraud detection services and backup dial-in connectivity. The SLIM CD Developer's Kits come in a variety of formats, for POS Developers, WEB Developers, and Hardware Integrators.

The SLIM CD gateway supports sending credit card transactions to most major US credit card processors, including TSYS, Chase/Paymentech, First Data, Elavon, Global Payments, Fifth Third, RBS Lynk, and Heartland Payment Systems.
