FOR IMMEDIATE RELEASE:

The SLIM CD Has Been Certified for First Data's North Platform

Certification Allows First Data's Merchants to Process High-Speed Credit Card and PIN Debit Transactions on the FDC North Platform

Coral Springs, FL Aug 1, 2009 – SLIM CD, INC, a software developer and service provider announces certification of the Slim CD gateway software on First Data Corporation's North (CardNet) platform. The Slim CD system includes point-of-sale software that supports both card-swipe and keyed transactions. The First Data certification allows retail and health care merchants to use the Slim CD software on First Data's North (CardNet) platform. Transactions are processed 2-5 seconds through Slim CD's Frame Relay connectivity to First Data, without requiring the merchants to have a leased line, VPN or use DataWire.

"We feel that support for the First Data's CardNet platform round out the processing capability of the SLIM CD software by adding PIN Debit and FSA card processing capabilities", said Sami Slim, CEO and President of SLIM CD, Inc. "SLIM CD is proud that major Pharmacy companies have selected SLIM CD to provide transaction processing services for their First Data merchant accounts."

The Slim CD offerings include a desktop application, virtual terminal, a shopping cart, a mobile phone application and a developer's toolkit. The SLIM CD desktop application runs on any IBM-Compatible Personal Computer with an Internet connection. Low-cost card swipes, signature-capture devices, and receipt printers are supported. An Enterprise Edition is available to perform merchant level recurring billing.

The SLIM CD software product is provided to ISOs, banks, and other financial institutions for distribution to their merchants. SLIM CD products are distributed through the merchant services channel partners. Use of the hosted shopping carts and per-transaction fraud screening services are bundled with the SLIM CD. More information about SLIM CD, Inc and the SLIM CD products are available at <http://www.slimcd.com>.
