**SLIM CD and SecurityMetrics Team Up To Save Developers with PABP / PCI**

***The SLIM CD and SecurityMetrics Offerings Combine to Save Developers Time, Money, and Effort in PABP/PCI Validations***

**Coral Springs, FL January 16, 2007** – SLIM CD, a leading developer of Credit Card Processing Software, Systems and Toolkits, and SecurityMetrics, a leader in PCI/PABP audits, have teamed up to provide complete package of tools, discounted validations, and discounted merchant monthly monitoring.

SLIM CD's POS Developer's Toolkit and WEB Development Toolkits have been audited by SecurityMetrics and have been successfully PABP Validated. SecurityMetrics has worked with the SLIM CD team to provide a list of simple instructions on how to use the toolkits and eliminate the need to store cardholder data. Following these instructions results in a clean POS or WEB application that is easy to use and easy to PABP-validate.

"SLIM CD has always placed PCI/CISP and security as a top priority", said Sami Slim, President and CEO of SLIM CD, Inc. "We are proud to have completed our fourth annual on-site PCI/CISP validation, and are honored to work so closely with a company such as SecurityMetrics. We believe they are the best in their business, and are excited about offering the same benefits we enjoy inside our systems to the developers that use our toolkits."

SLIM CD and SecurityMetrics have teamed up to offer developers that use the PABP-approved tools a discount for their PABP audit, or for monitoring of merchants that use products built using the SLIM CD toolkits. Developers that use these toolkits in compliance with guidelines inside the kits will simplify their PABP review and reduce the effort required to achieve PABP or PCI compliance.

"We were thrilled that SecurityMetrics has agreed to help developers using our PABP-verified toolkits become PABP-verified themselves.", said Frank Haggar, Director of Product Development for SLIM CD, Inc. "SecurityMetrics took this concept to the next level by providing PABP-verification discounts to the developers using our toolkits, and even further by providing discounts to the merchants using any of these PABP-validated products."

SLIM CD encourages all developers to achieve PABP validation. PABP compliance is easier for developers to obtain and requires less work if the toolkit is used properly and the SLIM CD Developer's Toolkits and follow the included PABP instructions.
